Studied the clinical applications of proteomics in disease diagnosis with special emphasis to disorders of pregnancy and other woman's health issues. Received training in specialized techniques of protein analysis, including mass spectrometry and gel electrophoresis. Extracted clinical and demographical data from medical records according to Yale IRB and HIPAA regulations. Ensured the integrity of research by keeping accurate records, calculating and summarizing various assay results. Maintained and entered data in databases for research protocols. Performed library and Internet research in order to interpret and synthesize data.

VOLUNTEER EXPERIENCE:

09 / 2000 - 11 / 2002 ♦ Intern

Yale New Haven Hospital - Elder Horizons Program

Evaluated patients older than 70 years of age newly admitted to the medical floors at Yale New Haven Hospital, by conducting a sensorial, cognitive and functional assessment. Selected appropriate patient care protocols based on the above evaluation and patients current and past medical problems. Provided empathetic support, companionship and information for older patients and families trying to cope with acute illnesses and hospitalization. Trained and directly supervised Elder Horizons volunteers. Collaborated with Elder Horizons geriatrician, medical residents, nursing staff and patient care associates as part of the interdisciplinary team. Presented medical topics of interests in the Elder Horizons rounds. Attended Yale Medical Grand Rounds.
